

An Astronaut's Life

Astronauts travel on a spaceship for their job. They live on board. They eat and sleep on the spaceship. They use a toothbrush to brush their teeth, just like they would on land. They sleep with a seatbelt on. This is different from how they would sleep on earth. When astronauts are back on land, they live like the rest of us. They go to classrooms. They drink milkshakes. They play football. They travel in cars. They may even travel by railroad train or airplane. For myself, I think it would be very fun to live on a spaceship.
