Jellyfish are not Jelly

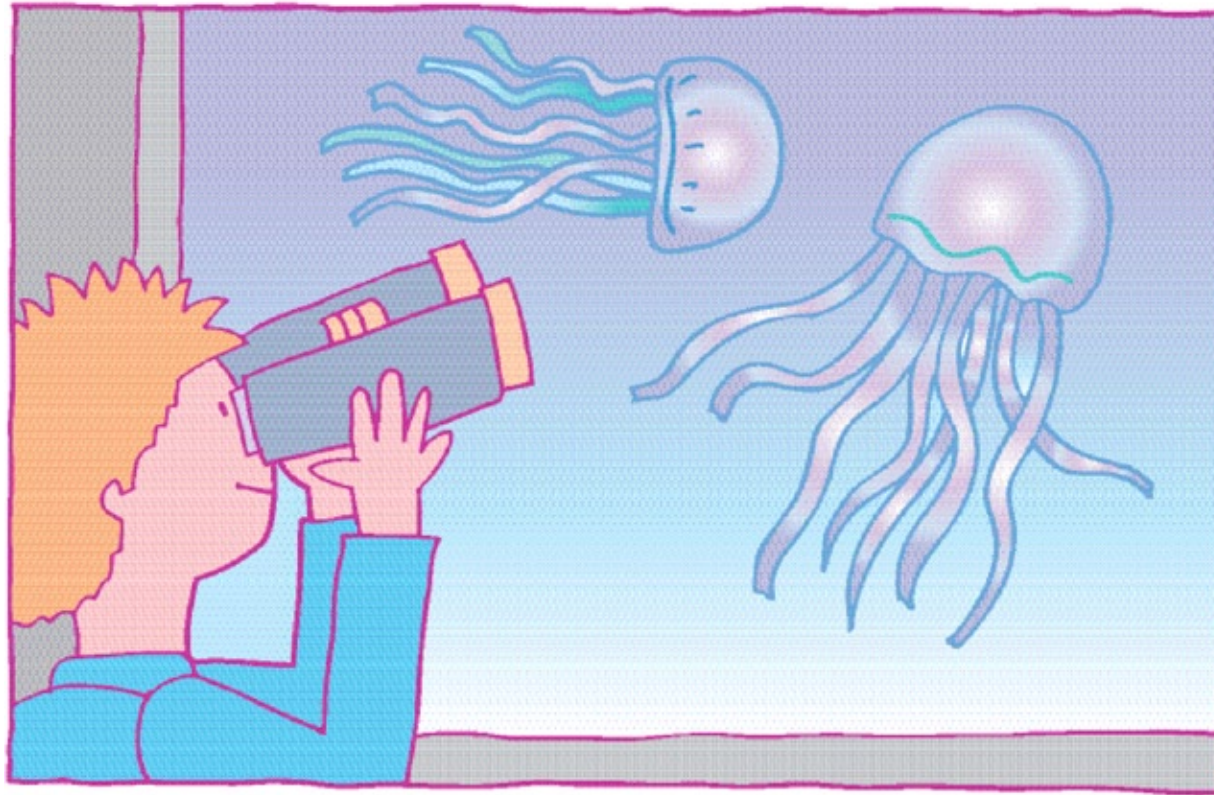

A Jellyfish is not made of jelly! It is an animal of the sea.

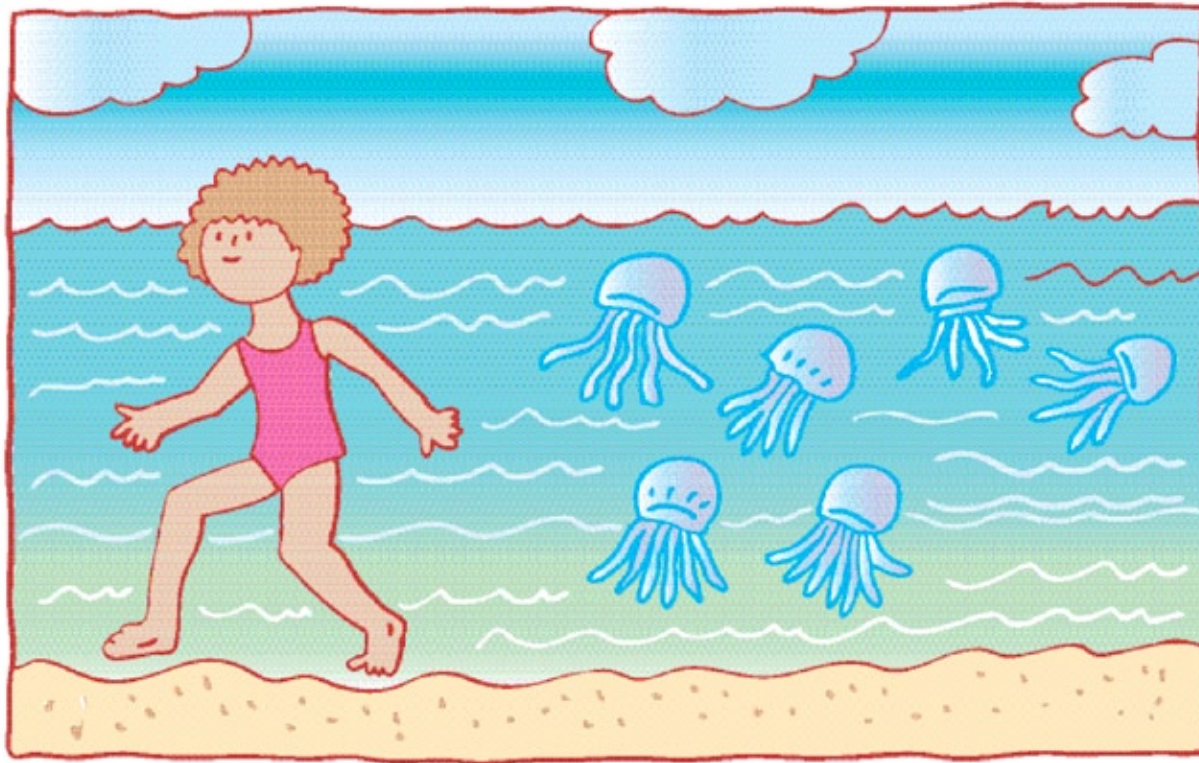

It can be round. It can be the shape of a bell.

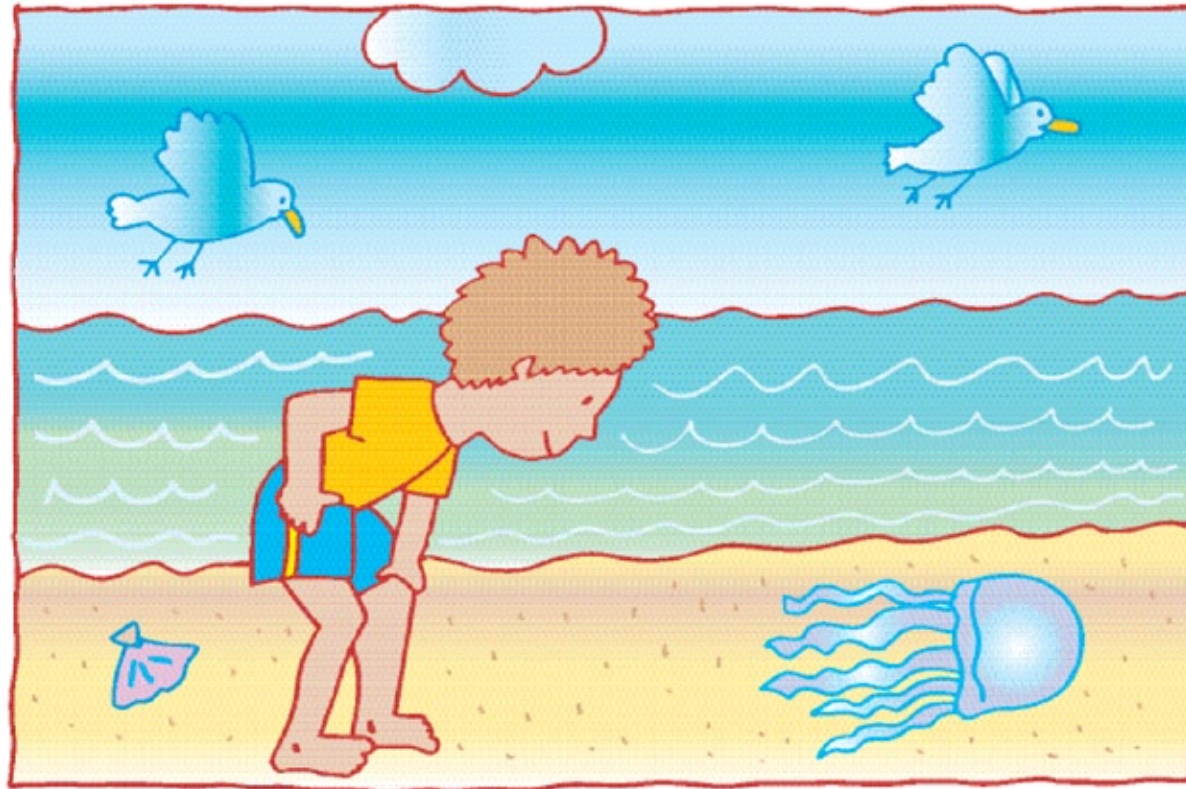

It has lots of arms that hang from its body like ribbons.

Jellyfish are hard to see.

If you wade in the sea, stay away from them. They can sting you!

If you see a still jellyfish on the shore, do not poke it. It can sting you from there.
