

The Sun

The sun is a powerful force. It enables plants to grow. Plants need sunshine. The sun empowers people to grow plants for food. It also enables people to live on the earth. If there were no sun, the earth would be too cold. It would also be dark. We need the sun to live. Many people enjoy the sun. It is nice to be outside on a sunny day. The sun's rays are strong. We must be safe in the sun. Scientists encourage us to wear sunscreen.
